CERTIFICATION

THE STANDARDS INSTITUTION OF ISRAEL

ISO 9001:2015

Quality Management System: Design, production, testing and marketing of solenoid valves and automation control equipment

THE STANDARDS INSTITUTION OF ISRAEL

ISO 14001:2015

Environmental Management System: Design, production, testing and marketing of solenoid valves and automation control equipment

THE STANDARDS INSTITUTION OF ISRAEL

ISO 45001:2018

Occupational Health & Safety Management System: Design, production, testing and marketing of solenoid valves and automation control equipment

CE

EC Declaration of Conformity
Complies with the requirements and provisions of the Council Directive 2014/35/EU
Available on selected models only

EN55011 Group1 - Class A / EN61000-6-1 / CFR 47 FCC Class A
EMC - SII Certificate of Conformity

UL 429
Standard for electrically operated valves
Only available for GEM-SOL® Coils

FCC
Product certification from The Federal Communications Commission
Available on selected models only

RU (UR)
"Recognized Component Mark" : a quality mark issued by UL and placed on components which are intended to be part of a UL listed product
Available on selected models only

AUTOMATION & CONTROL

SOLENOID VALVES

GEM-FLOW™ G75-A3P	1/8" Latch 2 Way, 3 Way NC, NO	8
GEM-FLOW™ G75-VSA	1/8" Stand-alone Solenoid 3 Way NC, NO	10
GEM-FLOW™ G75-A	1/8", 1/4" 2 Way, 3 Way NC, NO	14
GEM-FLOW™ GALIT	1/8" 3 Way Pilot Operated NC, NO	16
GEM-SOL® A32 (GEM-A)	1/8", 1/4" 2 Way NC, NO	18
GEM-SOL® A32 (GEM-A)	1/8", 1/4" 3 Way NC, NO	20
GEM-SOL® A3P32 (GEM-A3P)	1/8", 1/4" Latch 3 Positioning Manual Override 2, 3 Way NC, NO	22

SOLENOID VALVES

GEM-FLOW™ | G75-A3P

1/8" Latch 2 Way, 3 Way NC, NO

Technical Data

Function	2 Way NC, 3 Way NC, NO
Ports size	1/8" BSP & NPT
Orifice size	2.6 mm
Pressure range	NC 2 Way: 10 bar NC 3 Way: 8 bar NO 3 Way: 10 bar
Temperature range	Fluid: 5°C to 50°C (no freezing) Ambient: -10°C to 50°C
Materials in contact with media	Manual override: Plastic (Reinforced Nylon) NO: Red NC: Green Main Valve: UV Stabilized - Reinforced Nylon 6 30% GF Solenoid Operator: Stainless Steel AISI 300 & 400 series Seals: NBR
Mounting	2 x Ø6 mm holes
Manual override	3 positions (Open/Auto/Close)
Media	Air, water
Coil voltage	Latch
Switching time	40-60 msec
Electric connection	22AWG cable
Standard protection class	IP66

* Can only be operated with supplied coil

* Available with a manifold bracket upon request.
Please contact our technical sales department

Latch Coil Resistance vs Input Voltage Recommendations chart

Resistance [Ω]	Input voltage range [V]
1	8 - 12
4	12 - 18
9	18 - 24

GEM-FLOW™ | G75-A3P | 1/8" Latch 2 Way, 3 Way NC, NO

Dimensions

Manual Override Operation

To manually open the valve:
turn selector switch to OPEN

NO: To change from OPEN to AUTO:
turn the selector switch to AUTO

NC: To change from OPEN to AUTO:
turn the selector switch to CLOSE,
and then to AUTO

Mounting Bracket
Can be ordered separately
PN 5940610527

How to Order

G75-A3P	TYPE	PORT	FUNCTION ⁽¹⁾	ORIFICE	LATCH TYPE ⁽²⁾	WIRES					
with flange	1	1/8" BSP	10	2W NC	1	2.6	5a	1Ω	PA	two	Null
			11	3W NC	3	4Ω	PB	three	a		
		1/8" NPT	11	3W NC	3	9Ω	PC				
					3W NO	4					

Example: **G75-A3P-11015a-PA**

GEM-FLOW™ G75-A3P, with flange, 1/8" BSP, 2W NC, 2.6 orifice, 1Ω latch with two wires

(1) To order NC configuration, please consult with our technical sales department

(2) Refer to Latch Coil Resistance vs Input Voltage Recommendations chart

* To order valves manufactured according to your specific requirements, please contact our technical sales department

SOLENOID VALVES

GEM-FLOW™ | G75-VSA

1/8" Stand-alone Solenoid 3 Way NC, NO

Technical Data

Function	3 Way NC, NO
Ports size	1/8" BSPT & NPT
Orifice size	1.8 mm
Pressure range	0 to 8 bar
Switching time	30-50 ms
Temperature range	Fluid: 0°C to 50°C (no freezing) Ambient: -10°C to 50°C
Materials in contact with media	Manual override: Plastic (Reinforced Nylon) Main Valve: Plastic (Reinforced Nylon & POM) Solenoid Operator: Stainless Steel AISI 300 & 400 series Seals: EPDM
Mounting	Lock nut on the bottom COM port
Manual override	Latch: 3 position latch: Auto, Close, Open AC: 2 position: Auto, Open
Media	Air, water
Coil voltage	Latch, AC (according to table)
Standard protection class	IP66

* Can **only** be operated with supplied coil

SOLENOID MANIFOLDS

GEM-FLOW™ G75-VM	Modular Manifold.....	26
--------------------	-----------------------	----

SOLENOID MANIFOLDS

GEM-FLOW™ | G75-VM

Modular Manifold

Technical Data

Function	3 Way NC, NO
Orifice size	1.8 mm
Pressure range	0 to 8 bar
Temperature range	Fluid: 0°C to 50°C (no freezing) Ambient: -10°C to 50°C
Materials in contact with media	Manual override: Plastic (Reinforced Nylon) Main Valve: Plastic (Reinforced Nylon & POM) Solenoid Operator: Stainless Steel AISI 300 & 400 series Seals: EPDM
Mounting	With bracket
Modular connection type	Thread type connection
Modular connection assembly recommendation	<ul style="list-style-type: none"> Manually tighten one station to another Using tools and/or excessive torques may lead to irreversible damage
Manual override	Latch: 3 position latch: Auto, Close, Open AC: 2 position: Auto, Open
Media	Air, water
Coil voltage	Latch, AC (according to table)
Standard protection class	IP66

* Can **only** be operated with supplied coil

PORT	NO	NC
1	Exhaust	Pressure
3	Pressure	Exhaust
COM	Out	Out

ELECTRIC & HYDRAULIC VALVES

GEM-SOL® | Z32 (GEM-Z)

Zero Differential Pressure 1/4" - 3/4" 2 Way NC, NO

Technical Data

Function	2 Way NC, NO
Ports size	1/4", 1/2", 3/4" BSP & NPT
Pressure range	See table * For plastic body, maximum working pressure is 4 bar
Kv (l/min)	See table
Temperature range	Fluid: -10°C to 80°C (no freezing) Ambient: -10°C to 50°C
Materials in contact with media	Main Valve: Brass, Stainless Steel AISI 316, Plastic (Reinforced Nylon)* * Plastic (Reinforced Nylon): only available in 1/2" Solenoid Operator: Stainless Steel AISI 300 & 400 series Seals: NBR, FKM, EPDM
Media	Air, water, oil
Coil voltage	• Voltage and power consumption - see table • All Baccara coil voltages are ± 10% of nominal
Standard protection class	IP65 with connector * Option: IP68 (please refer to GEM-BP Coil)

- When switching from an AC to a DC coil, the solenoid operator must be changed as well.
- Can be used in vacuum application from -1 bar to maximum pressure - see tables.

GEM-FLOW™ | 500 Series

Hydraulic Control Valves

General Description

500 series valves are direct diaphragm closing automatic hydraulic control valves which work with line pressure. They ensure easy and smooth flow with minimum pressure losses thanks to excellent design of the valve body and diaphragm. No wearable parts such as stem, bearing and seat exist in the main valve body and valve life is much longer than other competitor valves. The only movable part of the valve is the valve diaphragm.

500 series hydraulic control valves are designed so that they can be used in portable water force network, agricultural irrigation, filtration and industrial applications by even unskilled personnel.

General Features

- Easy use and maintenance due to simple design
- Low cost
- Operation in wide pressure range
- Perfect modulation even in lower flow rates
- Anti-surge closing and opening with flexible diaphragm
- Full tightness thanks to reinforced diaphragm and inner spring
- Long life with Glass Reinforced Polyamide material
- Wide control application range by using different pilot valves
- Operation in both horizontal and vertical positions in application areas

GEM-FLOW™

Operating Principals

It is an automatic hydraulic control valve designed to make desired modulation in main valve network line as full hydraulically by means of line pressure without requiring different energy sources such as electric, pneumatic or mechanical energy.

Valve Opening Mode

When the pilot valve located on the main valve being in closed position, is brought into relief position, pressurized water within control chamber on main valve diaphragm is released. When line pressure (P1) reaches to a value which will overcome spring force, water carries valve to fully open position by applying a hydraulic force to valve diaphragm from bottom.

Modulation Mode

Pilot valves which are connected to main valve actuator ensure that main valve works in modulated mode. According to flow rate or pressure conditions, it ensures that main valve works in modulation mode by controlling pressure of fluid within main valve actuator (control chamber).

Valve Closing Mode

Pilot valves which are connected to main valve actuator ensure that main valve works in modulated mode. According to flow rate or pressure conditions, it ensures that main valve works in modulation mode by controlling pressure of fluid within main valve actuator (control chamber).

Available Models

Technical Data

Pressure range	Standard	0.7 - 10 bar (10 - 160 psi)
Temperature range	Fluid Ambient	(-10°C to 60°C (no freezing) -10°C to 60°C
Connection	Threaded	BSPT-NPT
Hydraulic connections	Standard	Reinforced Nylon (Air Brake) Hydraulic Pipe-SAE J 844
Actuator type	Standard	Diaphragm Closing Type with Single Control Chamber and Diaphragm Actuator

Available Models

GEM-FLOW™ | G500-S

Hydraulic with Manual Selector 1-1/2" - 4"

Description

G500-S model valve is the hydraulic control valve operated by line pressure and designed to ensure opening/closing process by means of a 3 Way selector valve. Minimum opening pressure of valve is 0.7 bar. Thanks to its flexible diaphragm, it makes easy and fast control process in high pressure applications and is closed completely tight without causing surge. It may be used in different applications by adding different pilot valves on its main body.

Applications

- Use G500-S for local operation of hydraulic valve by a manual command
- Use G500-S for water distribution and field

Standards

- G500-S: manual control valve with 3 Way selector valve, polyethylene plastic tubing and nylon fittings

How to Order

* To order valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G500-EL

Electric Solenoid Control Valve 1-1/2" - 4"

Description

G500-EL model valve is the hydraulic control valve operated by line pressure and designed to ensure opening/closing process by means of built-in 3 Way solenoid pilot valve controlled remotely with electric signal*. Electric signal for solenoid pilot valve is ensured by means of a control device, time relay, main switch and PLC control units etc. Opening/Closing process may be realized easily thanks to manual control on solenoid pilot valve, depending on requirements, 24V AC 50Hz/60Hz or 12V DC, 9V Latch and 12V DC Latch normally open (NO) or normally closed (NC), solenoids coils may be used on main valve.

* For technical information, refer to G75-A and G75-A3P solenoid valves

Applications

- Use G500-EL to remove operation of hydraulic valve by an electric command
- Use G500-EL for water distribution

Standards

- G500-EL: 3 Way NO Solenoid, polyethylene plastic tubing system and nylon fittings
- G500-ELM: 3 Way NO Solenoid, polyethylene plastic tubing system, nylon fittings and 3 Way selector

How to Order

GEM-FLOW™ G500 Electric with manual selector, 2" BSPT, 24V AC, two wires

- (1) For G75-A3P Latch
 (2) For Latch only

- a 3W selector valve
- b In-line finger filter
- c Plug
- d Solenoid Pilot Valve

* To order valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G500-C

DC Battery Controller 1-1/2" - 4"

Description

G500-C model valve is the hydraulic control valve operated by line pressure and designed to ensure opening/closing process by means of built-in solenoid pilot valve controlled remotely with electric signal at required time or required duration. Electric signal for solenoid pilot valve is ensured by means of a control device, time relay, main switch and PLC control units etc. Opening/ Closing process may be realized easily thanks to manual control on solenoid pilot valve, depending on requirements. The controller irrigates in cycles, during a window of time according to your needs.

Applications

- Use G500-C for programmed irrigation
- Use G500-C for water distribution

Standards

- G500-C: 9V DC Latch solenoid, Control Unit (1 Outlet), polyethylene plastic tubing system, nylon fittings and 3 Way selector

How to Order

G500-C	-	TYPE	-	PORT	
		One valve	null	1-1/2" BSPT	70
		Window	W	1-1/2" NPT	71
		Window +	W+	2" BSPT	80

- d Solenoid Pilot Valve
- e Controller

Example: G500-C-W-90

GEM-FLOW™ G500 DC Battery controller, Window, 3" BSPT

* To order valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G500-PR

Pressure Reducing 1-1/2" - 4"

Description

G500-PR model pressure reducing control valve is the hydraulic control valve which reduces high upstream pressure value to desired lower pressure value by means of built-in pressure reducing pilot valve. Pressure reducing control valve controls downstream pressure value continuously and maintains it constant without being affected from flow rate and upstream pressure values. When no flow exists in the system, it closes itself automatically. When valve upstream pressure value is lower than set point, it is opened fully by itself. Valve may be used in vertical or horizontal positions in the system.

Applications

- Use G500-PR for irrigation, water distribution and filtration systems
- Smart designed G500-PR provides high corrosion resistance

Standards

- G500-PR: 3 Way plastic pressure reducing pilot, polyethylene plastic tubing system and nylon fittings
- G500-PRM: 3 Way plastic pressure reducing pilot, polyethylene plastic tubing system, nylon fittings and 3 Way selector
- Standard pressure adjustment from factory: 2.5 bar

How to Order

G500	TYPE	PORT	PRESSURE RANGE
without Manual Selector	PR	1-1/2" BSPT 70	0.5-5 bar Y
with Manual Selector	PRM	1-1/2" NPT 71	1-10 bar G

Example: G500-PR-80G

GEM-FLOW™ G500 pressure reducing without manual selector, 2" BSPT, 1-10 bar

* To order valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G500-PREL

Solenoid Controlled Pressure Reducing 1-1/2" - 4"

Description

G500-PREL model pressure reducing valve is the hydraulic control valve which reduces high upstream pressure value into desired lower pressure value. Control of main valve is achieved by means of built-in solenoid pilot valves*. Electric signal for solenoid pilot valves is ensured by means of a control device, time relay, main switch and PLC control units etc. Automated control may be easily ensured by this way in application systems.

* For technical information, refer to G75-A and G75-A3P solenoid valves

Applications

- Use G500-PREL for water distribution, where downstream pressure should be reduced, the valve is commanded to open

Standards

- G500-PREL: 3 Way plastic pressure reducing pilot, solenoid 24V AC NO, polyethylene plastic tubing system and nylon fittings
- G500-PRELM: 3 Way plastic pressure reducing pilot, solenoid 24V AC NO, polyethylene plastic tubing system and nylon fittings and 3 Way selector
- Standard pressure adjustment from factory: 2.5 bar

How to Order

GEM-FLOW™ G500 Solenoid controlled pressure reducing, with manual selector, 2-1/2" BSPT, 24V AC, two wires, 1-10 bar

- (1) For G75-A3P Latch
- (2) For Latch only

* To order valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G500-PRPS

Pressure Reducing & Sustaining Control Valve 1-1/2" - 4"

Description

G500-PRPS model pressure reducing/sustaining hydraulic control valve reduces valve downstream pressure to desired value by sustaining upstream pressure. Two pilot valves exist on the valve. Pilot valve on upstream side is the pressure sustaining pilot valve and sustains upstream pressure. The other pilot valve is pressure reducing pilot valve and keeps downstream pressure constant by reducing it to desired value. Reducing/sustaining control valve pumps fluid downwards; it ensures that the system works within normal values by regulating overflow and high pressure in pumping systems. It controls upstream and downstream pressure continuously and keeps them within constant values.

Applications

- Use G500-PRPS for protecting booster pumps and preserving set pressure downstream

Standards

- G500-PRPS: 3 Way plastic pressure reducing pilot, 3 Way plastic pressure sustaining valve, polyethylene plastic tubing system, nylon fittings and 3 Way selector

How to Order

G500-PRPS	-	PORT		PRESSURE RANGE	
		1-1/2" BSPT	70	0.5-5 bar	Y

Example: G500-PRPS-80G

GEM-FLOW™ G500 pressure reducing & sustaining 2" BSPT, 1-10 bar

* To order valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G500-QR

Quick Pressure Relief 1-1/2" - 4"

Description

G500-QR model quick pressure relief valve is the safety control valve designed to protect the system by releasing pressure surges, which are caused by sudden changes in water speed due to pumps put into/out of service, in water network elevation lines to the atmosphere quickly. When network pressure exceeds set point, the valve opens by itself quickly and protects the system by releasing over pressure. When the line pressure decreases to normal level, it is tightly closed slowly and automatically without causing a surge.

* For technical information, refer to G75-A and G75-A3P solenoid valves

Applications

- Use G500-QR when wishing to avoid unwanted high pressure

Standards

- G500-QR: 3 Way plastic pilot, polyethylene plastic tubing system and nylon fittings
- G500-QRM: 3 Way plastic pilot, polyethylene plastic tubing system and nylon fittings and 3 Way selector

How to Order

G500	TYPE	PORT	VOLTAGE	WIRES	PRESSURE RANGE
	without Manual Selector QR	1-1/2" BSPT 70	No solenoid (hydraulic) 0	two null	0.5-5 bar Y
	with Manual Selector QRM	1-1/2" NPT 71	24V AC 1	three ⁽²⁾ a	1-10 bar G

GEM-FLOW™ G500 quick pressure relief, without manual selector, 1-1/2" BSPT, 24V AC, two wires, 1-10 bar

(1) For G75-A3P Latch
 (2) For Latch only

* To order valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G500-PS

Pressure Sustaining Control Valve 1-1/2" - 4"

Description

G500-PS model pressure sustaining hydraulic control valve maintains valve upstream pressure value constant. Valve is opened when line pressure reaches the preset pressure level. It ensures that pump motor within pumping systems will start without load. It also prevents positive pressure waves caused by pump during start-up. The valve controls upstream pressure value continuously and keeps it at a constant value without being affected from changes in flow rate. When no flow exists, it closes tightly by itself.

* For technical information, refer to G75-A and G75-A3P solenoid valves

Applications

- Use G500-PS for maintaining a constant upstream pressure or to avoid unwanted high pressure

Standards

- G500-PS: 3 Way plastic pressure sustaining pilot, polyethylene plastic tubing system and nylon fittings
- G500-PSM: 3 Way plastic pressure sustaining pilot, polyethylene plastic tubing system, nylon fittings and 3 Way selector
- Standard pressure adjustment from factory: 2.5 bar

CONTROLLERS & SPECIAL VALVES

ii.ri-C

Smart Irrigation Controller 2 Way

- Single station Irrigation Controller
- Wireless operated by smart device
- Four irrigation program types
- Minimum required iOS 7 or Android V4.3
- Battery included

Technical Data

Function	2 Way Latch
Pressure range	0.5 to 8 bar
Temperature range	Fluid: 5° to 50°C (no freezing) Ambient: -5° to 50°C
Communication protocol	Wireless BLE
App Downloading	 
Pairing code	Not required
Communication range	Up to 10 m (32.8 feet)
Battery type	CR123
Mounting	Direct mounting on UNEF 3/4"
Standard / Certification	<ul style="list-style-type: none"> • CE • Federal Communications Commission (FCC) • EN55011 Group1 - Class A / EN61000-6-1/ CFR 47 FCC Class A • EMC- SII Certificate of Conformity
Standard protection class	• Dust and watertight IP68

ii.ri-C | Smart Irrigation Controller 2 Way

Programming Key Features

Four different irrigation plans

Weekly	Interval Days	Even / Odd Days	Window
Irrigation each day of the week	Periodical days up to 98 periods	Even / odd calendar dates	Repeated cycles within a defined time frame
Set up to 6 cycles per day			Set cycle On and Off duration
Option to set different irrigation durations per cycle			Set start and end times for irrigation

How to Order

ii.ri-C	PORT	FLOW CONTROL	COLOR
	None Null	with 5	Grey CLOUD
	3/4" BSPT 50	without ⁽¹⁾ 6	
	3/4" NPT 51		
	1" BSPT 60

GEM-FLOW™ G75 Window+ controller with: GEM-SOL® A32 (GEM-A) valve, Brass, 1/8" BSP, 3W NO, 2.4 orifice, NBR, no manual override.

* To order controllers manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G75-DP

Baccara Differential Pressure Gauge Switch

- Reads and reacts to pressure differential between two reading points
- Suitable to work with both media - air and liquid
- Main applications: filters backwash, pumps control, pressure control

Technical Data

Mechanical	<ul style="list-style-type: none"> • Operating temperature: -10°C to 60°C (no freezing) • Outdoor UV protection • Front panel cover protection • "H" proof pressure: 14 bar (203 PSI) • "H" pressure must be \geq "L" pressure.
Electrical	<ul style="list-style-type: none"> • Power supply: 6-24V DC or 12-24V AC • RED + BLK power supply • YELLOW / WHT N.O contact • Low power detect • Dry contact (N.O) 0.5A at 24V AC • Internal memory to retain "set-up data" at power down.
Mounting	<ul style="list-style-type: none"> • 2" (52mm) diameter • 2ft (60cm) 4 wires cable • Pressure ports 1/8" BSP/NPT (male) • High pressure port is marked by the letter "H" on the housing • Connect high pressure before low pressure • Disconnect low pressure before high pressure
Software	See 'Programming key features' table
Display	<p>The LCD display:</p> <ul style="list-style-type: none"> • DIF: measured differential pressure • SET: pressure differential trigger setting • ON: displayed when the switch contacts are closed <p>Display resolution:</p> <p>1 PSI in the range 0 - 99 psi 0.1 bar in the range 0.0 - 7 bar</p>
Standard protection class	<ul style="list-style-type: none"> • Dust and watertight • IP66

How to Order

G75-DP	-	TYPE	ACCESSORIES
		Stand alone	1
		Mounting bracket	B

Example: G75-DP-1B
GEM-FLOW™ G75-DP Baccara Differential Pressure Gauge switch, stand alone with mounting bracket

Programming Key Features

Manual operation
PSI or bar display
Time interval between pressure measurements
Contact closed time
Time interval between contact closure
Zero calibration

* To order special valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G75-DFC-DC

Baccara Filtration Controller Set (DFC)

- Filtration backwash controller 1-3 stations
- Main valve output is optional
- Backwash by DP or time interval
- The assembly includes controller and differential pressure sensor
- Mounting bracket optional

Technical Data

Controller Set Supplied with	DFC controller, suitable for DC only, and one analog sensor
Mechanical	<ul style="list-style-type: none"> • Operating temperature: -10°C to 60°C • Outdoor UV protection • Front panel cover protection • "H" proof pressure: 14 bar (203 PSI) • "H" pressure must be ≥ "L" pressure.

Example: G75-DLS-1B

GEM-FLOW™ G75-DLS Digital Level switch, stand alone, with mounting bracket

* To order special valves manufactured according to your specific requirements, please contact our technical sales department

GEM-FLOW™ | G75-ADP

Baccara Analog Differential Pressure Sensor

- Differential pressure to current transducer
- Suitable to work with both media - air and liquid
- Main application: analog sensor for filters backwash

Technical Data

Mechanical	<ul style="list-style-type: none"> • Operating temperature: -10°C to 60°C (no freezing) • Outdoor UV protection • Measuring pressure range: 0-7 bar (0-101.5 PSI) • "H" proof pressure: 14 bar (203 PSI) • "H" pressure must be \geq "L" pressure
Electrical	<ul style="list-style-type: none"> • Power supply: 5V DC • RED: (+) 5V • BLACK: (-) 5V • ORANGE: analog output • Analog output value: 0.2V to 4.7V, [V out = (0.006429xKpa+0.2)± Error] • Output accuracy: 2.5% of full scale
Mounting	<ul style="list-style-type: none"> • 2" (52mm) diameter • 2ft (60cm) 3 wires cable • Pressure ports 1/8" BSP/NPT (male) • High pressure port is marked by the letter "H" on the housing • Connect high pressure before low pressure • Disconnect low pressure before high pressure
Standard protection class	<ul style="list-style-type: none"> • IP66

Optional Mounting Bracket

How to Order

G75-ADP	-	TYPE	MOUNTING BRACKET	
		Stand alone	1	without 0 with 1

Example: G75-ADP-10

GEM-FLOW™ G75-ADP Baccara Analog Differential Pressure sensor, stand alone, without mounting bracket

* To order controllers manufactured according to your specific requirements, please contact our technical sales department

GEM-SOL® | LD032 (GEM-LDO)

Long Distance Operator 2 Way, 3 Way NC, NO

Technical Data

Function	2 Way, 3 Way NC, NO
Current	Holding 4mA
Pressure range	Refer to working pressure definitions of the valve that the GEM-LDO is assembled on, with DC10W/AC8W
Power	<ul style="list-style-type: none"> • DC12V (0.05W) up to DC24V (0.1W) • 24V AC: 0.3W
Connection	Red/Black - power supply Green/Black - coil Lead wire length - 28cm PVC coated AWG 18 UL 1007
Ambient temp	-10°C to 70°C
Operation	Only with GEM-BL-LDO coil and Baccara valve
Applications	<ul style="list-style-type: none"> • Cost saving wiring for remote solenoid operation • Power saving and heat prevention on continuous energized solenoid
Voltage	Voltage and power consumption - see table
Standard protection class	IP67 (LDO only)

LDO unit

A small section conductor can be used at a distance of up to 5 kms

* For recommended wire parameters, please refer to Long distance operators charts

Voltage	Distance (km)	Conduit section (mm ²)	Delay Time (sec)	
			On	Off
12/24	5	0.5	3	1

Valve Functions

Two way valves have one orifice and two ports: one inlet and one outlet. They are available with the following functions:

- Normally Closed (NC) Fig. 1 - valve is closed for flow through the valve when the coil is de-energized.
- Normally Open (NO) Fig. 2 - valve is open for flow through the valve when the coil is de-energized.

Fig. 1

Fig. 2

Three way valves have two orifice and three ports: inlet, outlet and exhaust. They are available with the following functions:

- Normally Closed (NC) Fig. 3 - no flow from inlet port, flow is from outlet port to the exhaust.
- Normally Open (NO) Fig. 4 - flow from inlet port, no flow from the exhaust port.

Fig. 3

Fig. 4

Also available are the following non-standard functions: Divertor Fig. 5 - one inlet pressure with two outlets, one outlet is NO and the other NC. Selector Fig. 6 - two inlet pressures, one inlet is NO and the other NC.

Fig. 5

Fig. 6

Operating Mechanism

A solenoid valve is a combination of two functional units:

- A solenoid (electromagnet) with a moving core (plunger).
- A valve body containing the right orifices and seals mechanism.

The plunger in a solenoid valve moves and changes the flow direction when a current is supplied to the electromagnet.

There are two basic types of Baccara GEM-SOL® valves:

Direct operated solenoid valves

When the solenoid is energized in a direct acting valve, the plunger moves and directly acts on the valve disc to open, close or change the flow direction. Direct acting valves' performance depends directly on the orifice pressure and the magnetic power. The increase of line pressure or the orifice size requires more power from the electromagnet.

Pilot operated solenoid valves

These valves are recommended for applications where high flow at high pressure is required. A pilot chamber is used which is controlled by a direct acting solenoid valve. The movement of the plunger changes the pressure in the pilot chamber.

When there is pressure in the pilot chamber the valve is closed. GEM-SOL® pilot valves are equipped with diaphragm, according to the valve function.

- Two way valves have a bleeding passage in the diaphragm, through which the pilot pressure flows into the pilot chamber; and one orifice to release the pressure when the solenoid is energized.
- Three way valves have a three way pilot solenoid to control the pilot chamber pressure.
- Pilot operated valves require a minimum operating pressure.

Zero differential valves

We also manufacture a two way pilot operated valve which works without differential pressure. For this type of valve, a mechanical spring helps to lift the diaphragm.

Valve Sizing

General

It is not recommended to select a solenoid valve according to its pipe connection port or its orifice size. The valve selection depends on the knowledge of the following factors: pressure range minimum and maximum, differential pressure, minimum and maximum flow rate, the specific gravity of the fluid, temperature, viscosity, etc.

Pressure

The pressure is generally measured above the atmospheric pressure and is expressed in kg/cm² or bars of relative pressure. The value of pressure terms in this catalog corresponds to the relative pressure.

Pressure drop ΔP

This is the difference of pressure between the upstream P1 and the downstream P2 of the valve when it is crossed by the fluid.

Differential pressure

Minimum - maximum

This is the minimum or maximum difference of pressure between the upstream P1 and the downstream P2 which secures perfect functioning of the device. Only a pilot operated solenoid valve requires the minimum differential pressure to operate.

Flow - the flow factor Kv (Cv)

The flow of a solenoid valve is the quantity of fluid per time units crossing the valve under certain conditions. It is this factor which determines its size. To obtain a simpler method of calculation and comparison between the various types of valves, all variables permitting the calculation of the flow have been reduced to a common denominator: the flow factor Kv (without units). The Kv factor can be determined by the flow chart or by calculation. When the Kv factor is determined, select the solenoid valve which has the equivalent flow factor. The flow factor values given in this catalog have been set up according to the following method:

Fluid is water, specific gravity 1 kg/dm³ the pressure drop P1, P2 is 1Kg/cm² in a way that the Kv is equal to the flow in liter/min.

$$Q = Kv \sqrt{\frac{\Delta P}{\gamma}} \quad Kv = Q \sqrt{\frac{\gamma}{\Delta P}}$$

When several valves are mounted in series, the resulting flow factor is equal to:

$$\frac{1}{Kv_{Tot}^2} = \frac{1}{Kv_1^2} + \frac{1}{Kv_2^2} + \frac{1}{Kv_3^2} + \dots + \frac{1}{Kv_n^2}$$

When several valves are mounted in parallel, the resulting flow factor is equal to:

$$Kv_{Tot} = Kv_1 + Kv_2 + Kv_3 + \dots + Kv_n$$

Unit conversion
Kv = flow factor (decimal units)
to convert
CV(USA) = 0.070Kv
f(UK) = 0.0585Kv
Kv = 14.28 Cv (USA)
Kv = 17.11 f (UK)

Viscosity

Practically, the flow Kv is identical for a valve crossed by water or a medium having up to 3°E viscosity. The flow/pressure characteristic is effected above this limit. It is necessary to consider factor above 3°E - the flow factor Kv will be:

$$Kv_x = Kv_{water} \cdot C$$

$$C = \frac{\delta \sqrt{Kv}}{200 Q} + 1$$

δ = kinematic viscosity (in centistokes) of the fluid

Q = flow in liter/min

Kv = flow factor given in catalog

This calculation leads to a choice of a valve with a higher flow factor value than the one which would have been chosen for a fluid having a viscosity of 3°E.

Temperature

The limits of temperature of use of a solenoid valve depend essentially upon the nature of the discs and the design of the coil. The temperature developed in a solenoid valve is a function of the electrical characteristics of the coil, the duty cycle, the fluid and ambient temperatures. These parameters determine the "temperature of use".

For each type of solenoid valve, the temperature range is given in the technical data, however these figures are only a general guide. If temperature of use might extend the given limits, please contact our technical sales department.

Response time

The response time of a solenoid valve is the lapse of time between the electric signal and the outlet of fluid signal. The response time is effected by the following parameters: Valve function, operating mode, orifice size, inlet pressure and pressure differential, fluid, temperature and coil characteristics. The C.E.T.O.P defines the test of conditions as follows:
Test pressure: air at 6Kg/cm² - 85 PSI
Ambient temperature: 200 C - 680 F

Response time at energizing

Response time at energizing of the solenoid and until the outlet pressure reaches 90% of the test pressure.

Response time at de-energizing

Lapse of time between de-energizing of the solenoid and until the pressure outlet drops to 10% of the test pressure, see schemas of measure method and resulting curves for AC and DC current.

Average response time for GEM-SOL® valves can be assumed as follows:

- Direct acting solenoids 16 to 36 ms for complete cycle.
- Large direct acting solenoids 40 to 80 ms for complete cycle.
- Pilot operated valve 20 to 80 ms for complete cycle.

Cycling rate

The cycling rate of a solenoid depends directly on its response time. It is the number of cycles per minutes calculated for continuous operation. The valve should not be reversed at less than 90% or above 10% at discharging of reference pressure.

$$\text{Cycles/Minutes} = \frac{60 \text{ sec}}{R_{T_e} + R_{T_d}}$$

R_{T_e} = response time at energizing (sec)
R_{T_d} = response time at de-energizing (sec)

The cycling rate is the maximum possible cycles per minute of the solenoid valve. It varies when the valve is mounted in a circuit and depends then upon the installation pressure drop.

GEM-SOL[®] Elastomer Materials

General information

GEM-SOL[®] solenoid valves can be used for many fluid types including acids, gases, solvents etc. To ensure appropriate functioning of the valve, particular care must be taken with the selection of the valve and seals materials. The information below summarizes the elastomers materials used for GEM-SOL[®] valves.

Please contact our technical department for further information.

NBR or BUNA-N

- NBR is a copolymer of butadiene and acrylonitrile. It is the most used elastomer in the seals industry and is the standard elastomer for GEM-SOL[®] valves.
- NBR is suitable for use from -20°C to 85°C. It has benefits over other elastomers with its compression set, tear and abrasion resistance.
- Air, cold water and inert gases are some of the materials NBR is recommended for.

EPDM - Ethylene Propylene Rubber

- EPDM is an elastomer made from ethylene and propylene monomers. It has a wider temperature range than NBR, -40°C to 149°C. Its main disadvantage is that it cannot be used with petroleum oils.
- Water, alcohol and acetone are some of the materials EPDM is recommended for.

Neoprene

- Neoprene is homopolymers of chloroprene. It has a temperature range of -20°C to 85°C. Neoprene is unusual because it is resistant to both oxygen and petroleum.
- Refrigerants, oxygen and petroleum oils are some of the materials Neoprene is recommended for.

FKM

- FKM is a very important elastomer due to its wide compatibility to chemicals. It has a temperature range of -20°C to 180°C. This gives FKM a significant advantage over NBR, but it is still not the ultimate elastomer.
- Diesel oil, gasoline, some acids and trichlorethylene are some of the materials FKM is recommended for.

Max. conduits resistance 5

G75

Wires cross-section selection for distance installation of G75 solenoids

Solenoid type: G75 24V AC					
No. of solenoids	1	2	3	4	Distance
Cross-section [mm ²]	0.5	0.5	0.75	1.0	100m
	0.5	1.0	1.5	2.5	200m
	0.75	1.5	2.5	2.5	300m
	1.0	2.5	2.5	4.0	400m
	1.5	2.5	4.0	6.0	500m
	1.5	4.0	4.0	6.0	600m
	2.5	4.0	6.0	6.0	700m
	2.5	4.0	6.0		800m
	2.5	4.0	6.0		900m
	2.5	6.0			1000m

Max. conduits resistance 15

Solenoid type: G75 latch 4Ω					
No. of solenoids	1	2	3	4	Distance
Cross-section [mm ²]	0.75	1.5	1.5	2.5	10m
	1.5	2.5	4.0	6.0	20m
	1.5	4.0	6.0	6.0	30m
	2.5	6.0	6.0		40m
	4.0	6.0			50m
	4.0				60m
	4.0				70m
	6.0				80m
	6.0				90m
	6.0				100m

Max. conduits resistance 0.6

Long Distance Operators Charts

LDOS32 (LDOS) | Long distance operating solenoid

Number of solenoids that operate simultaneously as a function of wire cross-sectional [mm ²] area and distance [mt] from energy source				
Distance in meters from energy source	WIRE CROSS-SECTIONAL AREA [mm ²]			
	0.50	1.00	1.50	2.50
200	12	25	38	65
400	6	12	19	40
600	4	8	12	21
800	3	6	9	16
1,000	2	5	7	13
1,500	1	3	5	9
2,000	1	2	3	6
2,500	1	2	3	5
3,000		1	2	4
3,500		1	2	4
4,000		1	2	3
5,000		1	1	2
6,000			1	2
7,000			1	1
8,000			1	1
9,000				1
10,000				1

Wire's maximum resistance for one solenoid is 175

For further technical information, please refer to product pages in Controllers & Special section

LDOS32 (LDOS) assembled with S32 (GEM-S) solenoid

G75-LDO | Long distance operator 2 Way, 3 Way NC, NO

LD032 (GEM-LDO) | Long distance operator 2 Way, 3 Way NC, NO

Number of solenoids that operate simultaneously as a function of wire cross-sectional [mm ²] area and distance [mt] from energy source				
Distance in meters from energy source	WIRE CROSS-SECTIONAL AREA [mm ²]			
	0.50	1.00	1.50	2.50
200	24	56	78	130
400	12	28	39	65
600	8	18	26	43
800	6	14	19	32
1,000	4	11	15	26
1,500	3	7	10	17
2,000	2	5	7	13
2,500	2	4	6	10
3,000	1	3	5	8
3,500	1	3	4	7
4,000	1	2	3	6
5,000	1	2	3	5
6,000		1	2	4
7,000		1	2	3
8,000		1	1	3
9,000		1	1	2
10,000		1	1	2

Wire's maximum resistance for one solenoid is 390

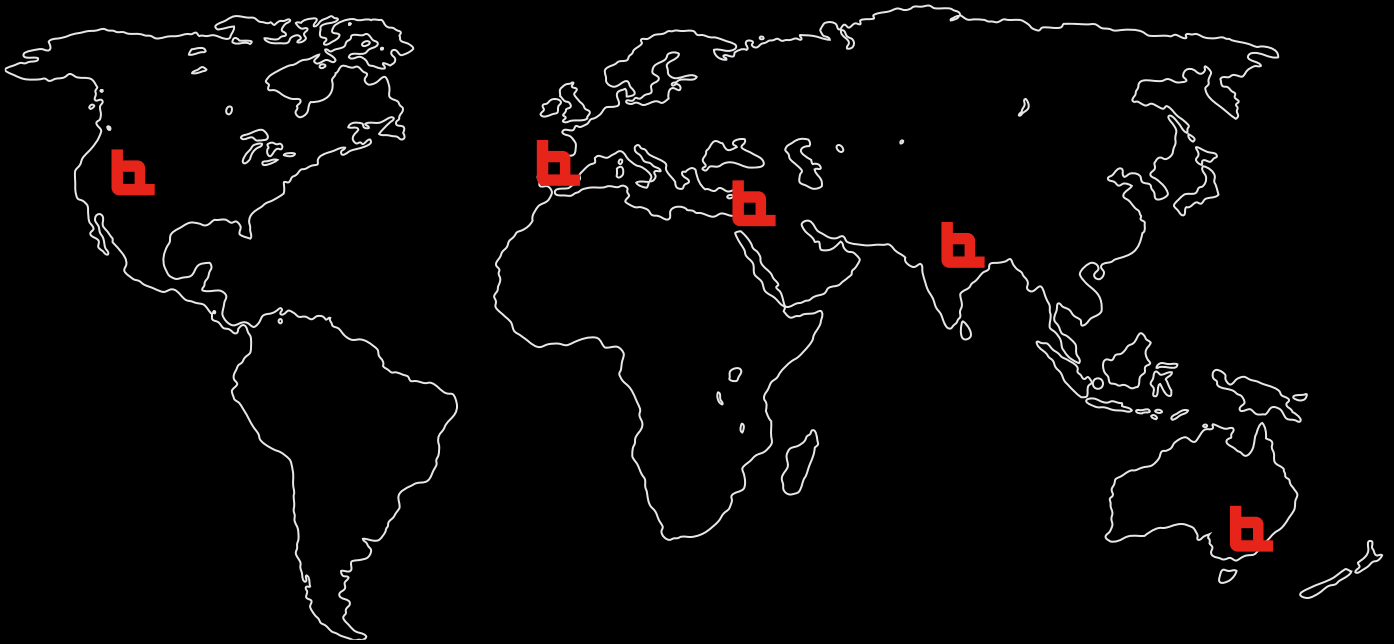

For further technical information, please refer to product page in Controllers & Special section

G75-LDO | assembled with G75-A operator & solenoid

LD032 (GEM-LDO) assembled with A32 (GEM-A) solenoid
